Ria Kapoor

Bengaluru, India | +91 90000 00000 | ria.kapoor@example.com | example.com/ria

PROFESSIONAL SUMMARY

Backend Engineer with 5 years building distributed systems in production: idempotent APIs, reconciliation, Kafka event streaming and PostgreSQL. Experienced in on-call ownership and incident response. Seeking a Senior Backend Engineer role in payments.

CORE COMPETENCIES

Distributed Systems • Idempotency • Reconciliation • Ledger • Event Streaming • Incident Response • On-call • API Design • Performance Tuning

Systems: Python • PostgreSQL • Kafka • Redis • AWS (ECS, RDS, SQS) • Docker • Grafana • PagerDuty

PROFESSIONAL EXPERIENCE

Backend Engineer II

Tiffinly, Bengaluru — Jul 2023 – Present

- Own the order-dispatch service assigning riders to orders in 14 cities (Python, PostgreSQL, Redis, Kafka, AWS).
- Implemented idempotency keys with a unique constraint on assignment retries, ending duplicate assignments during network timeouts.
- Built nightly reconciliation of rider payouts against the payouts ledger, with a ticket for every mismatch.
- Led incident response for the Diwali-eve dispatch backlog; wrote the postmortem and the Kafka consumer backpressure fix.
- Reduced p99 latency of the assignment API from 900 ms to 240 ms using a Redis geo index.

Backend Engineer I

Tiffinly, Bengaluru — Jul 2021 – Jun 2023

- Built the refund flow for cancelled orders, including partial refunds.
- Served on the on-call rotation from month six; authored four runbooks.

EDUCATION

B.Tech, Computer Science, Example Institute of Technology — 2021

PROFESSIONAL DEVELOPMENT

Go • Payment Systems • Double-Entry Ledger Design
