Skills

- Distributed systems
- Idempotent APIs
- Reconciliation
- Incident response

Systems

- Python, SQL
- PostgreSQL, Redis
- Kafka
- AWS (ECS, RDS, SQS)
- Grafana, PagerDuty

Education

B.Tech, Computer Science
Example Institute of Technology, 2021

Professional Development

- Go
- Payment systems
- Double-entry ledgers

Profile

Backend engineer with five years on high-volume order systems. I make retries safe, keep money and records reconciled, and lead calmly when production breaks.

Experience

Backend Engineer II | Jul 2023 – Present

Tiffinly, Bengaluru

- Own the order-dispatch service that assigns riders to orders in 14 cities.
- Ended duplicate rider assignments during timeouts with idempotency keys under a unique constraint.
- Built the nightly reconciliation of rider payouts against the payouts ledger.
- Led the Diwali-eve backlog incident; wrote the postmortem and the backpressure fix.
- Cut p99 latency of the assignment API from 900 ms to 240 ms with a Redis geo index.

Backend Engineer I | Jul 2021 – Jun 2023

Tiffinly, Bengaluru

- Built the refund flow for cancelled orders, including partial refunds.
- On-call from month six; wrote four of the team's runbooks.

Achievements

- Postmortem for the Diwali-eve backlog adopted as the team's incident template.
